

# Analytics in a day

Cloud analytics in the age of  
self-service and data science

# Agenda & Intro

Times are approximate and will be fluid with the class

## Morning

- 9:00 – 9:30     Insights for All – Azure Synapse Overview
- 9:30 – 11:30    Integrated Platform - Azure Synapse Analytics
- 11:30 – 12:00   Lab Intro & Lab 1 : Data Loading

## Afternoon

- 1:00 –2:00     Lab 1 : Continued
- 2:00 –3:00     Lab 2: Azure Synapse Performance
- 3:00 –4:00     Insight for all with Power BI + Azure Synapse
- 4:00 –5:00     Lab 3: Azure Synapse + BI

# Insights for All – Azure Synapse

# Today, all businesses are data businesses

Data is the lifeblood of modern work

**Data makes  
business possible**

**Data is crucial to  
businesses of all sizes**

**Securing data is  
mandatory**

# All data businesses need to be analytic businesses

Without analytics data is a cost center, not a resource

**Businesses need to  
“know thyself”**

**Workers are empowered  
with intelligent insights**

**Augmented intelligence  
sees patterns we cannot**

# Analytic businesses need to evolve data science

Every business has opportunities to make analytics faster, easier, and more insightful

**Data science empowers us to go farther**

**Businesses need scalable analytics**

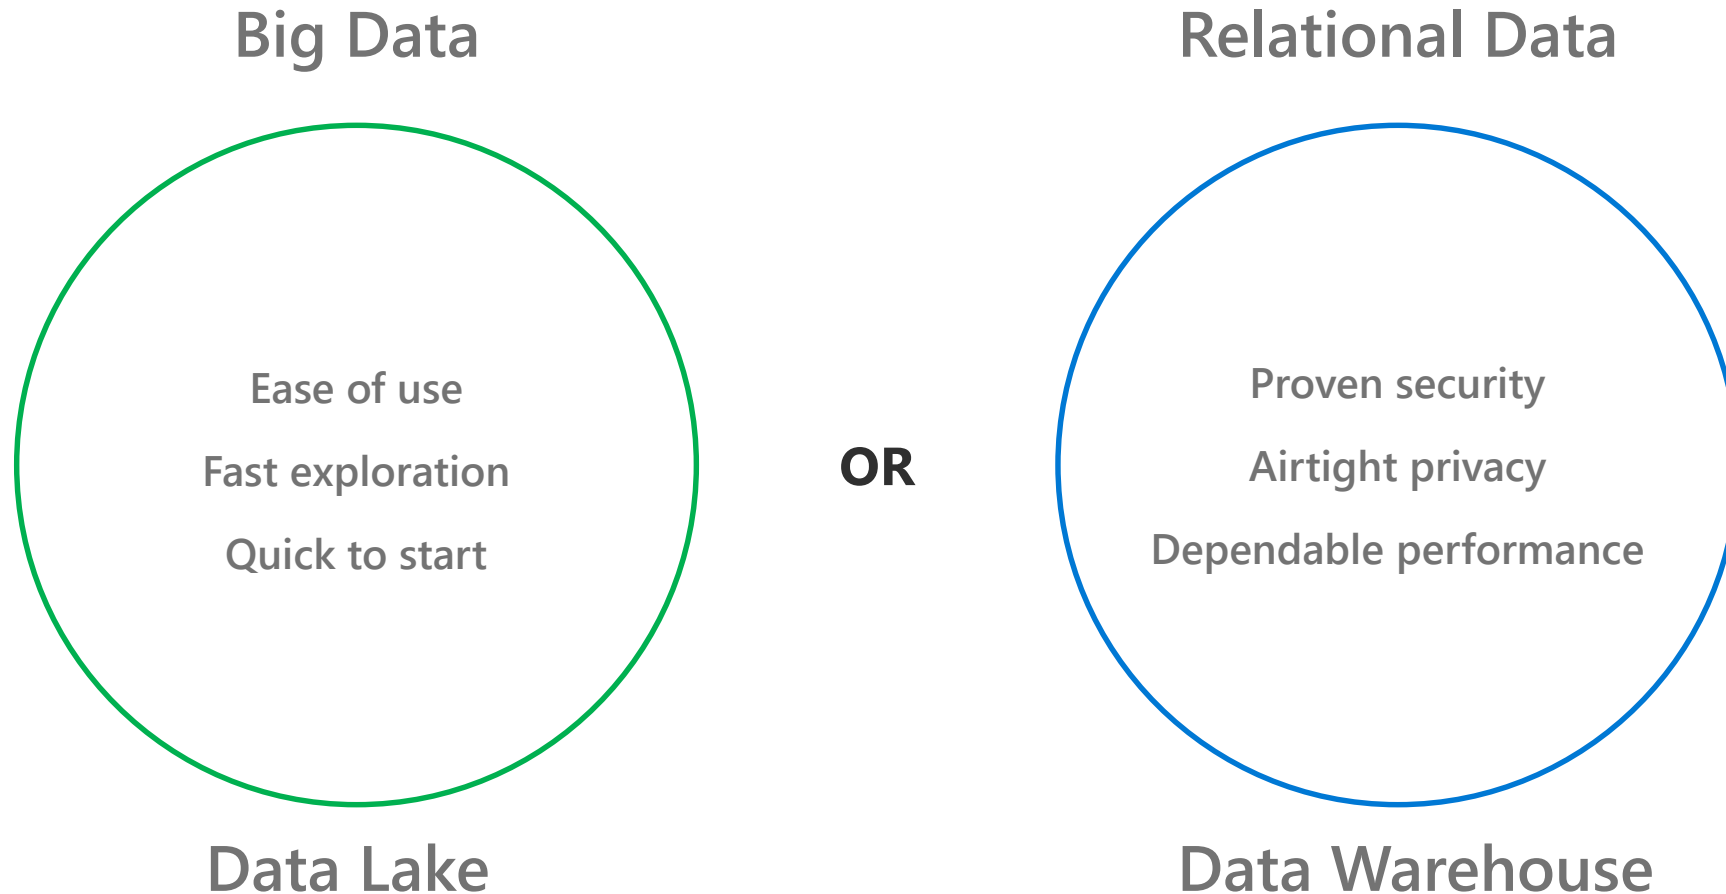

**AI/ML creates smarter organizations**

# Azure Synapse Analytics

Limitless analytics service with unmatched time to insight

***Azure Synapse is Azure SQL Data Warehouse evolved—blending big data, data warehousing, and data integration into a single service for end-to-end analytics at cloud scale.***

This is a result of businesses being forced to maintain two critical, yet independent analytics systems

# Azure brings these two worlds together, in a single service

## Welcome to Azure Synapse Analytics

# Azure Synapse Analytics

Limitless Scale

Powerful Insights

Unified Experience

Unmatched Security

# Limitless scale provides a breathtaking view of your data

All of it, from warehouses and Big Data lakes  
with limitless scalability, provisioned or  
serverless,  
and intelligently optimized workload  
performance.

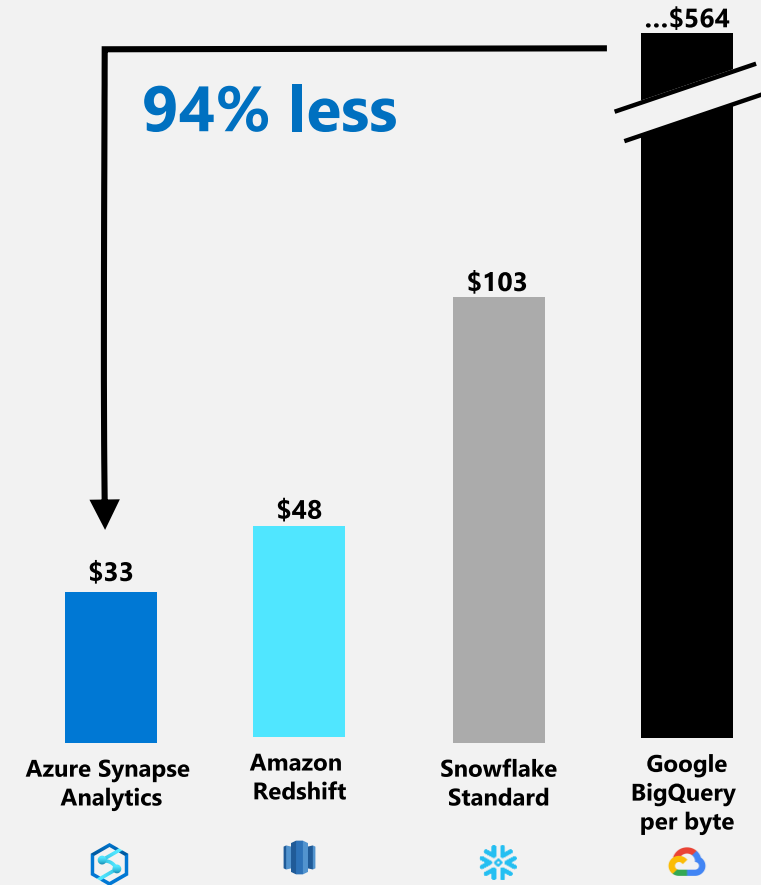

# A breakthrough in the cost of enterprise analytics

With the best price-performance in the business

Up to **14x** faster and costs **94%** less than other cloud providers

## TPC-H Benchmark

Price-performance | Lower is better

# Unlock powerful insights, get a multi-layered grasp of your business

Integrated BI and machine learning drives insight for all users

from the data scientist, coding with statistics, to the business user with Power BI.

# Build end-to-end analytics solutions with a unified experience

A consistent version of data for everyone  
*and* all analytics use cases,  
but with zero management and  
maintenance,  
plus financially backed SLAs.

## Rigorous assurance of safe-keeping with the most advanced security and privacy features

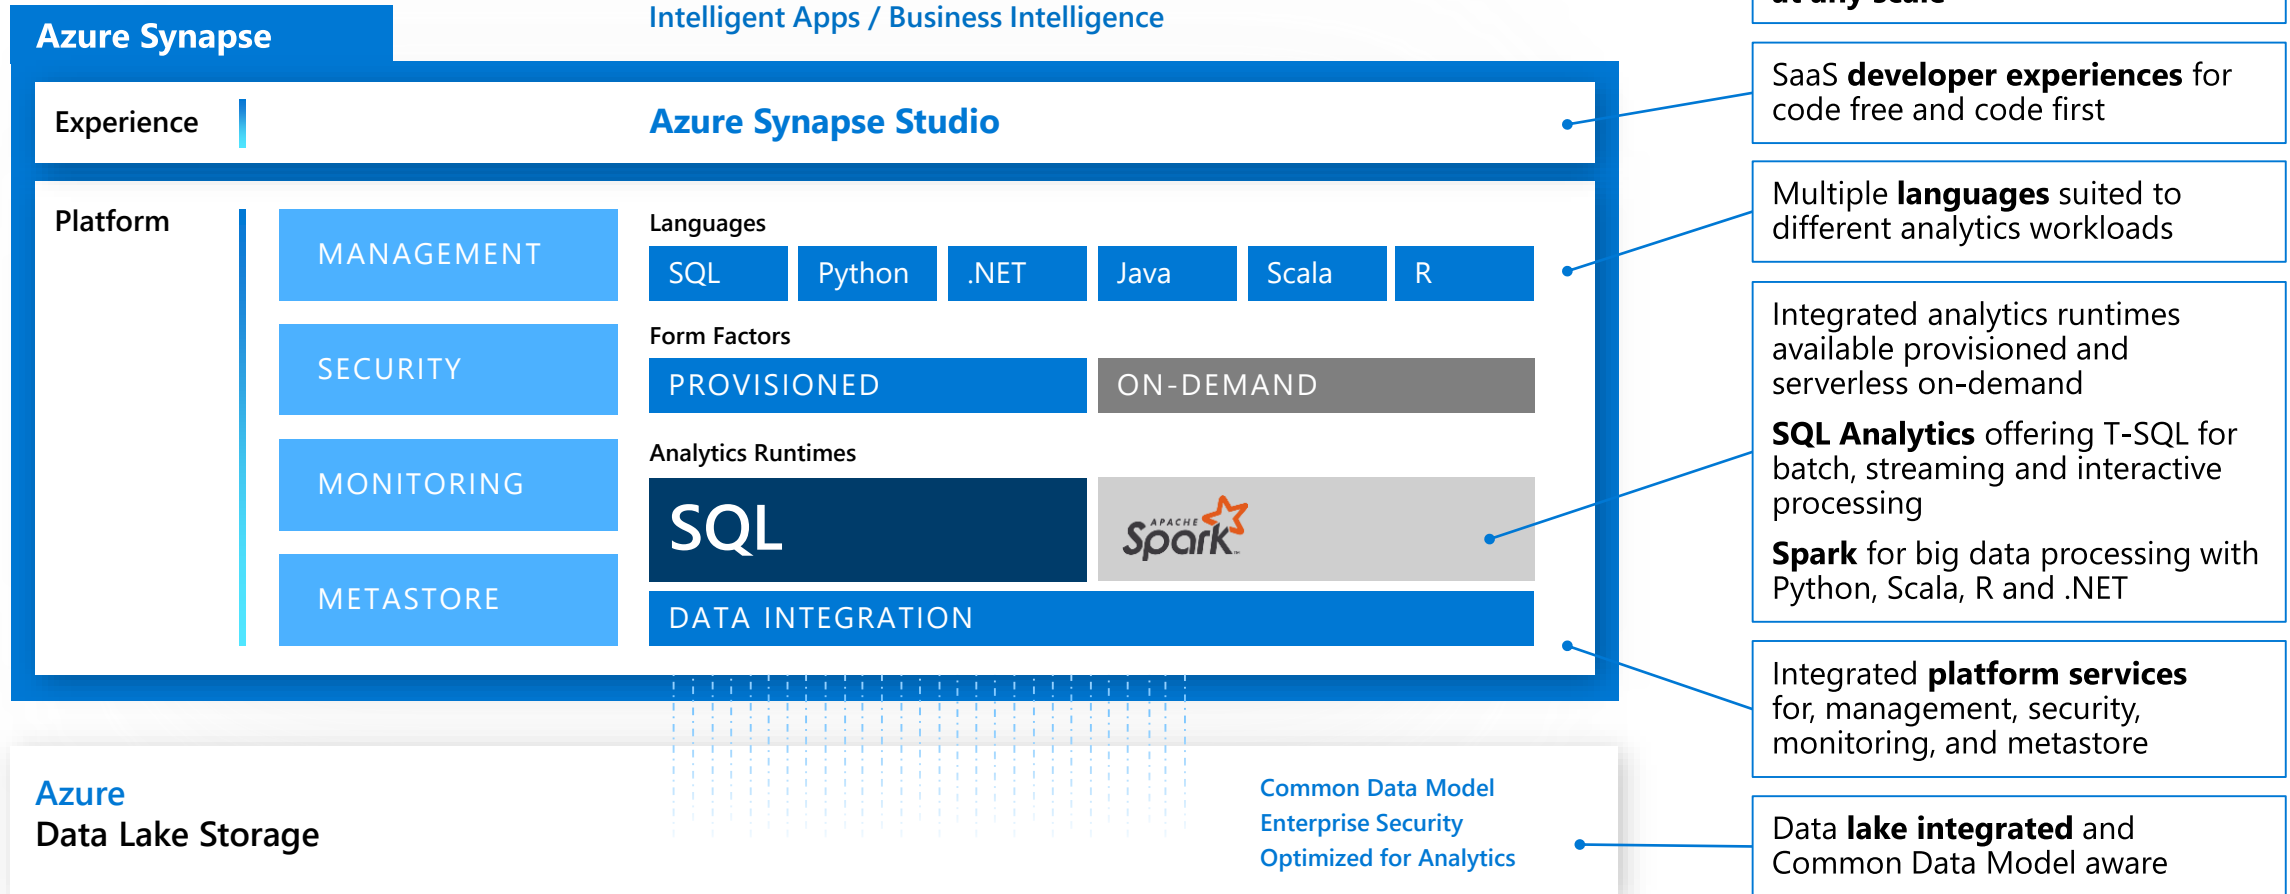

We protect sensitive data in real time,  
monitoring and responding to threats as  
they arise,  
with industry-leading security *and* privacy  
features  
at no extra cost to you.

# Azure Synapse Analytics

Limitless analytics service with unmatched time to insight

Artificial Intelligence / Machine Learning / Internet of Things  
Intelligent Apps / Business Intelligence

# SQL Analytics - Core Architectural Pillars

## **Hassle-free Management**

**Built in scale, management, and support**

## **Auto backup and geo-restore**

**Auto backups every 4 hours, retention for 7 days, and geo-replicated**

## **Scale and Separation**

**Separates storage and compute for elastic scale. Scales on-demand**

## **Market leading Security & Automation**

**Automation, policy-based, and industry leading security**

# SQL Analytics - Core Architectural Pillars

<b>Built for data lake</b>	Query any data over the data lake at PB scale
<b>Elasticity &amp; resiliency</b>	Stateless service architecture— separation of state and compute
<b>Performance</b>	Tier 1 performance of appliance form factor.
<b>Concurrency</b>	High concurrency via resource aware task scheduling.
<b>Autonomous workload manager</b>	Self-tuned workload management: capacity planning, access control and resource governance.

# Azure Synapse Analytics

A limitless analytics service with unmatched time to insight
